

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	28 September 2026
Team ID	SWTID-2026-1668
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room. 10 minutes to prepare 1 hour to collaborate 2-8 people recommended (our team: 5)	Before you collaborate A little bit of preparation goes a long way with this session. (10 minutes) A. Team gathering – defined who participates in the session and shared relevant information about ServiceNow Service Catalog and Flow Designer. B. Set the goal – focus on automating the ordering and approval of standard laptops. C. Learn how to use the facilitation tools.	1 Define your problem statement (5 minutes) What problem are you trying to solve? Frame your problem as a How Might We statement.
--	--	---

PROBLEM

How might we automate the ordering and approval of standard laptops in ServiceNow using Flow Designer, so that requests are fulfilled faster with less manual work?

Key rules of brainstorming: Stay on topic. Encourage wild ideas. Defer judgment. Listen to others. Go for volume. If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm (10 minutes) – Write down any ideas that come to mind that address your problem statement.

KARTHIKA R (Team Leader)

Auto-create a catalog item for standard laptop requests	Auto-approve requests that match the standard laptop model	Send email notification on request submission
---	--	---

BRINDHA S

Trigger flow when a Service Catalog request is submitted	Manager approval only for non-standard specs	Update request state automatically after fulfilment
--	--	---

JANANI P

Create a fulfilment task for the IT hardware team	Check stock / asset availability before ordering	Auto-populate user, department and location details
---	--	---

KANIMOZHI P

Dashboard to track laptop orders and delivery status	Error handling and fallback notification to admin	Reminder alerts for pending approvals
--	---	---------------------------------------

PARAMESHWARI V

Email notification to requester on completion	Use Flow Designer subflows to reuse approval logic	Test the flow with sample requests before go-live
---	--	---

3 Group ideas (20 minutes) – Similar ideas were clustered and each cluster was given a label.

Order Intake & Trigger	Trigger flow on catalog request submission • Catalog item for standard laptop • Auto-populate user, department and location
Approval Automation	Auto-approve standard laptop requests • Manager approval only for non-standard specs • Reminders for pending approvals
Fulfilment & Inventory	Fulfilment task for IT hardware team • Stock / asset availability check • Update request state after fulfilment
Notifications & Monitoring	Email on submission and completion • Error handling with admin alert • Order and delivery status dashboard

Step-3: Idea Prioritization

4 Prioritize (20 minutes) – Place your ideas on this grid to determine which ideas are important and which are feasible. Importance: which tasks would have the most positive impact. Feasibility: which tasks are more feasible than others, regardless of importance (cost, time, effort, complexity).

Importance ↓ Feasibility →	Low	Medium	High
High		• Stock / asset availability check	• Trigger flow on request submission • Auto-approve standard laptop requests • Fulfilment task for IT hardware team
Medium		• Error handling and admin alert • Reminders for pending approvals	• Email notifications • Update request state automatically
Low		• Order and delivery status dashboard	

Outcome: The green cell holds the ideas to build first: the request trigger, auto-approval for standard laptops and fulfilment task creation. Notifications and status updates come next, while stock checks, error handling and the dashboard are planned as later enhancements.
