

Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer ServiceNow User Experience & Process Map		 Entice Configuration & Approval	 Enter Procurement Processing	 Exit Fulfillment & Delivery	 Extend Setup & Post-Support	 Scale Feedback & Optimization
 Steps	- IT User needs a new standard laptop. - User searches internal IT portal.	- User selects laptop and accessories. - User submits request form. - Manager approval is triggered.	- Procurement receives approved request. - Flow Designer automatically creates a Purchase Order (PO) in ERP. - PO is sent to vendor. - Vendor confirms.	- IT receives laptop from vendor. - IT performs imaging and asset tagging. - Laptop is shipped to user. - User receives laptop.	- User opens box and follows setup guide. - User logs in and accesses apps via SSO. - User requests support if needed.	- User is prompted for feedback on the process. - Survey data is analyzed by IT leadership. - Workflow is optimized based on data.
 Interactions	- Self-service portal (laptop catalog view). - Service Catalog item (e.g., "Standard Dell Latitude"). - Portal search bar.	- Request Form UI (dropdowns for accessories, justifications). - ServiceNow Flow Designer (approval workflow initiated). - Manager's email approval notification.	- ServiceNow/ERP integration (PO creation). - Vendor email communication. - Flow Designer task assigned to Procurement team.	- Asset Management in ServiceNow. - Shipping carrier tracking (FedEx/UPS). - User delivery confirmation email.	- Quick Start Guide (physical/digital). - ServiceNow IT Service Portal (for Day 1 support). - Software Center (for additional apps).	- Post-fulfillment feedback survey (ServiceNow Survey). - Performance Dashboard (Tableau/ServiceNow). - Quarterly Process Review meeting.
 Goals & Motivations	- Help me replace my broken laptop. - Help me find the right standard device quickly.	- Help me configure my laptop with a second monitor. - Help me get manager approval fast.	- Help Procurement process this PO without errors. - Help me track the order status.	- Help IT get the laptop ready fast. - Help me receive my laptop on time.	- Help me get online and productive on day 1. - Help me find all my applications.	- Help me provide feedback on my experience. - Help IT continuously improve the procurement process.
 Positive Moments	- Catalog is easy to navigate. - Standard options are clear.	- Form is pre-populated with user data. - Approval process is transparent.	- PO creation is instantaneous. - Vendor confirmation received automatically.	- Asset tagging is streamlined. - Shipping notification with tracking link.	- Setup guide was clear. - SSO was seamless.	- Easy to provide feedback. - Seeing improvements happen based on past feedback.
 Negative Moments	- Can't find the specific model I need. The search is generic. - Too many laptop options.	- Manager is on vacation; approval delays. - Justification field is confusing. - Too many mandatory fields.	- ERP integration error holds up process. - Vendor is out of stock; need to re-select. - Manual intervention required for PO.	- Imaging takes longer than expected. - Laptop was damaged in shipping. - Delays in asset tagging queue.	- Can't connect to VPN. - Software installation failed. - Password reset issue on first login.	- Survey is too long. - Don't feel like my feedback is read.
 Areas of Opportunity	- Implement "Recommended for You" based on job role. - Clarify standard vs. non-standard. - Improve search functionality.	- Automate out-of-office delegation. - Simplify justification. - Add a "Save as Draft" feature.	- Real-time vendor stock check. - Enhance ERP integration error handling. - Implement automated follow-ups with vendors.	- Automate asset tag generation. - Pre-image laptops at vendor side. - Expedite shipping method.	- Create an onboarding checklist in the portal. - Proactive "Day 1 Health Check" survey. - AI chatbot for common setup issues.
